

# Imagine Udny Charretteplus®

**Client:** Udny Community Trust Company Ltd

**Location:** Udny, Aberdeenshire

**Timeframe:** 2018-2019

## Project Summary

Imagine Udny was a series of community conversations which enabled the sharing of ideas on the future growth and development of Pitmedden and Udny Green, Aberdeenshire.

There was a particular focus on developing and exploring ideas that had been generated from previous engagement, bringing these together in a cohesive plan with clear direction. Alongside this, the plan was to be used to influence Aberdeenshire Council's statutory spatial and community planning process.

Key proposals in the plan included a new multi-functional community hub, a central square area with traffic calming, a bike park and workshop at a disused quarry, a new wetland greenspace at the entrance of Pitmedden, and improved path network connectivity.

## Why we did it

To bring together local residents and key stakeholders to create a shared vision and workable action plan to help address local development growth issues and community needs comprehensively.
